

Their Business Booming.
Probably no one thing has caused such a revival of trade at Hodgkinson & Co.'s drug store as their giving away to their customers of so many free trial bottles of Dr. King's New Discovery for Consumption. Their trade is simply enormous in this very valuable article from the fact that it always cures and never disappoints. Coughs, Colds, Asthma, Bronchitis, Croup and all those acute lung diseases quickly cured. You can test it before buying by getting a trial bottle free, large size \$1. Every bottle warranted.

Palpitation of the Heart.
Persons who suffer from occasional palpitation of the heart are often unaware that they are the victims of heart disease, and are liable to die without warning. They should banish this alarming symptom by cure the disease by using Dr. Flint's Heart Remedy. At all druggists or J. J. Mack & Co., 9 and 11 Front street, San Francisco.

Hodgkin's Arteria Sanguis.
The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, chapped hands, chilblains, corns, and all skin eruptions, and positively cures piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by Hodgkinson & Co.

Sudden Death.
Dr. Flint's heart remedy will prolong life by preventing those sudden deaths from heart disease which bring untold grief to families, often leaving them in poverty because of the untimely deaths of the bread-winner. At druggists, \$1.50. Descriptive treatise with each bottle; or address, J. J. Mack & Co., S. F.

W. PINNIGER. Would enjoy your dinner and are prevented by Dyspepsia, use Acker's Dyspepsia Tablets. They are a positive cure for Dyspepsia, Indigestion, Flatulency and Constipation. We guarantee them. 25 and 50 cents.

W. PINNIGER, Druggist.

Merit Will Tell.
Was never better demonstrated than when "Fryer's Asthma Remedies" were awarded diplomas at the late California State Fair at Sacramento, and at Mechanics' Hall, Boston, Mass. W. H. Pinninger is agent for these celebrated "Asthma Remedies" and he offers to return your money if they do not give satisfaction. Price 25 cents. Send a simple signature of Dr. Fryer is on each, as none are genuine without it.

Can't Sleep. Nights, is the complaint of thousands suffering from Asthma, Consumption, Coughs, etc. Dr. W. H. Pinninger's English Remedy! It is the best preparation known for all Lung Troubles, sold on a positive guarantee at 50c, 90c.

W. PINNIGER, Druggist.

Unnecessary Misery.
Probably as much misery comes from the want of knowledge of any derangement of the functions of the body, and it is difficult to cure, for the reason that no one likes to take the medicines usually prescribed. Hamburg Flgs were prepared to obviate this difficulty, and they will be found pleasant to the taste of women and children. Twenty-five cents at all druggists. J. J. Mack & Co., proprietors, S. F.

Acker's. Blood Elixir is the only Blood Remedy guaranteed. It is a positive cure for Ulcers, Bronchitis or Syphilitic Pneumonia. It purifies the whole system, and banishes all Rheumatic and Neuralgic pains. We guarantee it.

W. PINNIGER, Druggist.

An Absolute Cure.
The ORIGINAL ASTHMA OINTMENT is only put up in large two-ounce tin boxes, and is an absolute cure for all sorts of bronchitis, asthma, coughs and skin eruptions. Will positively cure all kinds of piles. Ask for the ORIGINAL ASTHMA OINTMENT. Sold by Osburn & Shoemaker at 25 cents per box—by mail 30 cents.

The reason. Why Acker's Blood Elixir is warranted, is because it is the best Blood Preparation known. It will positively cure all Blood Diseases, purifies the whole system, and thoroughly builds up the constitution. Remember, we guarantee it.

W. PINNIGER, Druggist.

Old. And reliable Medicines are the best to depend upon. Acker's Blood Elixir has been prescribed for years for all Impurities of the Blood. In every form of Scrofulous, Syphilitic or Malaria Diseases it is invaluable. For Rheumatism, has no equal.

W. PINNIGER, Druggist.

Cure for Piles.
Hemorrhoids are known by moisture like perspiration, producing a very disagreeable smell, and are very painful. This ointment, as well as Acker's Blood Elixir, and protruding Piles, yield at once to the application of Dr. Bosanquet's Balsom. This is a great relief to the sufferer, and the tumors allaying the intense itching, and effecting a permanent cure. At cents. Address The Bosanquet Medical Co., Piqua, Ohio. Sold by J. Hodgkinson & Co., Reno, Nev.

Give Them a Chance!

That is to say, your drugs. Also all you breathing machinery. Very wonderful machinery it is. Not only the larger air passages, but the thou ands of the tubes and cavities leading from them. When these are clogged and choked with matter which ought not be there you lungs cannot do their work. And when they cannot do their work, all the other organs of the body will suffer. Call it cold, cough, chronic pneumonia, asthma, consumption or any of the family of throat, nose and head diseases. Get rid of them. There is but one sure way to get rid of them. That is to take Bosanquet's Cough Syrup, which any druggist will sell you at a nominal price, even when that else has failed us, you may depend upon it.

Give Them a Chance!

This is the order which a little girl brought into a Lewiston druggist's store the other day. It was written on a dirty piece of note paper, as follows: "Mister Druggist: Please send syrup enough to throw up a four-year-old girl." Lewiston Journal.

The Previous Girl.
Her skirt gone it rustles.
As she goes down the stairs;
And in all the place there's never a face
One-half, one-half so fair;
But, oh! I saw her yesterday,
And no one knew 'twas she,
When a little sick child looked up and smiled,
As she sat on my lady's knee.

Her fan flutters and flutters,
Her eyes grow bright, grow dim;
And all around no man is found
But thinks she thinks of him.
But, oh! to her, the best of all,
Though they be great and grand,
Are less than the sick, whose smiles come quick,
At the touch of my lady's hand.

Her little shoe of satin
Peeps underneath her skirt;
And a foot so small ought never at all
To move in mire and dirt.
But, oh! she goes among the poor,
And heavy hearts rejoice,
As they can tell, who know her well
To hear my lady's voice.

Her glove is soft as feathers
Upon the nestling dove;
It touches a light, I have no right,
To think to dream of her.
But, oh! to her, in simple garb,
She goes where none may see,
I watch and pray that some happy day,
My lady may pity me.

—Puck.

A MILLION MATCHES A DAY.

How the Trade of New York is Supplied with Lights—A Description of the Process.

"Our factory turns out five millions of matches every working day," said a leading New York manufacturer. "The wood used in the manufacture of matches is the best pine plank, as free from knots as possible. Each plank is cut into twenty-eight or thirty blocks, each measuring 11 inches in length, 4½ inches in width and 2 inches thick. These blocks are cut up into splints by a machine of simple but ingenious construction. The cutting is done so rapidly that about 30 planks, each 12 feet long, 11 inches wide and 3 inches thick, can be cut up into splints during the course of a day.

"As the splints fall off the end of the block by the action of the horizontal knife they pass down a chute immediately under the block into a room below, where they are tied up in bundles, each containing half a gross. For this purpose a measure is formed consisting of a section of hollow cylinder of the capacity of half a gross of splints.

"The workman begins by throwing a piece of string across the measure, then taking up a number of splints from the confused heap, he ranges them in parallel order by a dexterous system of tossing and hunting, having filled his measure he catches the two ends of the string, ties up the bundle, throws it aside and then proceeds to make another, the work being done with the rapidity and precision which practice alone can give.

"These bundles are then piled on racks in a hot room and left for some hours until the moisture is expelled. The matches are now ready for sulphuring.

"The sulphur is melted and the two ends of the bundles are successively dipped, the bundle being shaken after each dipping, in order to get rid of superfluous sulphur. When the sulphur is dry and used again for dipping.

"The workman begins by throwing a piece of string across the measure, then taking up a number of splints from the confused heap, he ranges them in parallel order by a dexterous system of tossing and hunting, having filled his measure he catches the two ends of the string, ties up the bundle, throws it aside and then proceeds to make another, the work being done with the rapidity and precision which practice alone can give.

FRIDAY JUNE 1, 1888

In 1872 the Democratic party in National convention assembled adopted the following in relation to the tariff: "Recognizing that there are in our midst honest but irreconcilable differences of opinion with regard to the respective systems of protection and free trade, we remit the discussion of the subject to the people in their Congressional districts, and to the decision of the Congress thereon, wholly free from executive interference or dictation." "Free from executive interference" is good when we recall the fact that Horace Greeley was the Democratic nominee of that convention, and only a short time before had said if he had the power, he would "put a tariff on pig iron of one hundred dollars per ton."

The question was "referred to the people for discussion in their several Congressional districts," and in case they succeeded in electing their candidate, the administration so far as the tariff was concerned would withhold "executive interference or dictation." In 1872, the Democratic party regarded executive interference with questions upon which people honestly differed of sufficient importance to make it a National issue. Then Democratic leaders controlled and shaped the policy of the party.

The present owner of the Democratic party was then in the lowest primary grade of the school of statesmanship. He was serving the people of Erie county, New York, in the capacity of Sheriff, and had made a record of having hung two men expeditiously and successfully. He was at that time so deeply engrossed with his studies in statesmanship as to be unable to digest thoroughly this chunk of wisdom that fell from the Democratic table of 1872. Now, by accident, he is President.

In his last message to Congress he refers to no other question but the tariff, and at once inaugurates a policy of "interference and dictation" that is dictatorial in the extreme. Meeting at "Red Top" in Washington, making removals and appointments to strengthen the free trade wing of his party, appointing Lamar to the supreme court in obedience to the commands of the free traders of the South, and vetoing appropriations for necessary public buildings because they were introduced by men who honestly differed with him on the question of tariff, he is to-day the absolute dictator of the Democratic party. He is the Democratic party; his followers are only permitted to sneeze when he takes free trade snuff, and every fellow of any consequence who fails to "ker-chew" is immediately informed "there is an Allentown for every Sowden." President Cleveland certainly thinks the people have short memories. In his letter accepting the nomination for the Presidency he said: "The allurements of power, the temptation to retain public office once gained, and more than all, the availability of a party finds in an incumbent, whom a horde of office-holders with a zeal born of benefits received and fostered by the hope of favors yet to come, stand ready to aid with money and trained political service, we recognize in the election of the President for re-election a most serious danger."

With such honeyed words he sought to beguile the American people, and succeeded; and with his advice and approval his "horde of office-holders, with a zeal born of benefits received," and fostered by the hope of favors yet to come, have been sent out to all the Democratic conventions to shout for his re-nomination and free trade, notwithstanding he regards it as a "most serious danger."

BLAINE's letter to Whitelaw Reid finally sets at rest all doubts heretofore expressed as to his candidacy. The great Protectionist's most ardent advocates and warmest supporters must accept his declination as final and irreversible. It is to be hoped the Democracy will accept it as gracefully; for since the Florence letter was made public that party of broken promises has never let a day pass that it did not cause to be heralded the statement that Blaine's letter of declination was only a blind and a snare and not to be trusted for even a moment. The Republican party can now choose from the many available candidates within its ranks, and need only be required to select the one that can be sure in the thoroughly Republican States and strongest in the doubtful States.

The Equilibrium of Europe. LONDON, June 1.—A Buchanan newspaper published in Russian interest, declares that the Hapsburg House now virtually rules Turkey. Everything has been taken from the Turks except Constantinople. The equilibrium of Europe is destroyed and can not be restored under the present conditions. When the new equilibrium is established, Italy will reclaim Trieste; Germany will take back the German provinces which form so important a part of the United Austrian Empire; the States will unite in Slavonia, and, voices according to the theory of the Pan-Slavists, while Roumania will probably not emerge with empty hands.

OVER THE WIRES.

Sheridan's Condition Still Unchanged.

The National Prohibition Convention in Session.

A Department of Labor to be Created—A Young Wife Accidentally Killed—Etc.

THE PROHIBITIONISTS.

A Party Which Knows One Country, One People, One Flag and One Destiny.

INDIANAPOLIS, May 31.—J. P. St. John was chosen Chairman of the National Prohibition Convention yesterday.

Mr. St. John was received with a roar of applause when he appeared to make a speech. He made a sarcastic reference to Blaine's second letter of withdrawal, saying the Mainefield said to him before being crushed.

He was at the Democratic or Republican convention, with the air which won the names of rum, whisky and tobacco. It was a gathering which had at heart the best interests of the people, that knew no North or South, but did know one country, one people, one flag, one destiny.

The Committee on Platform not being ready to report, Dr. T. G. of the African M. E. Church, located in Georgia, was called to the platform. He made an energetic address, enunciating the platform of the Republican party, but declaring that as it has stopped in its good work, and now bows before King Alcohol, it is time for all good men to come out of it. When he concluded the audience adjourned until 9 o'clock to-morrow morning.

The General Committee on Resolutions last night decided, by a vote of 23 to 8, to incorporate an uncompromising woman suffrage plank.

INDIANAPOLIS, May 31.—The second day of the Prohibition Convention began promptly at 9 o'clock. The Committee on Rules limited the speakers to five minutes. The opponents of woman's suffrage asked one hour's discussion on the subject, but were defeated, the vote showing that two-thirds of the delegates were in favor of woman suffrage.

LITTLE PHIL.

Another Alarming Phase of General Sheridan's Case.

WASHINGTON, May 31.—8:30 P. M. It has just been ascertained that General Sheridan had another recurrence of heart trouble this afternoon, but it is stated that he is resting easily now.

Dr. U. S. Lincoln has been called in the case, and is now in consultation with the other doctors.

An official bulletin issued at 10 P. M. says that General Sheridan had another severe attack this afternoon. He has recovered very imperfectly, and his condition causes the greatest apprehension. At the request of Dr. O'Reilly, Dr. Pepper, Professor of Medicine at the Princeton University of Pennsylvania, has been telegraphed for and will arrive here about 4 o'clock to-morrow morning.

Midnight.—At this hour the General's condition seems to be growing worse and worse. While he is perfectly rational it is with difficulty that he can be railed, and the physicians feel that the end is near.

June 1—3 A.M.—There is no perceptible change in Sheridan's condition.

Fighting the Tariff.

WASHINGTON, June 1.—The fight over the tariff under the five-minutes' rule was begun yesterday, and has been a lively affair. The Republicans are out on fire and are fighting the bill, clause by clause and step by step. The evidently are determined to make a subversive fight. The Republicans are openly charging the majority of the committee with having refused hearings and disregarded petitions sent to them from all over the country. Mills is taking the lead on the Democratic side, but it will not be long before he will be knocked out. The crossing fire between Reed, Brown and McKinley with Mills lies broad and hot and the Texas is getting the worst of it.

Three Railroad Men Killed.

CHEYENNE, Wyo. T., May 31.—A collision occurred on the Cheyenne and Northern branch of the Union Pacific, near Bordeaux, between a work train and a passenger engine, which resulted in the death of the passenger conductor Hader, fireman Eam and brakeman Mayfield, and the probable death of the engineer, Brundage, and Marsden, and the serious injury of four other employees. A washout occurred the setting out of the work train. On the arrival of the northbound passenger at Bordeaux the conductor ran with an empty engine to the scene of the washout to learn the situation. While making the run the collision occurred with the work train, which was running to Bordeaux at full speed.

The Equilibrium of Europe.

LONDON, June 1.—A Buchanan newspaper published in Russian interest, declares that the Hapsburg House now virtually rules Turkey. Everything has been taken from the Turks except Constantinople. The equilibrium of Europe is destroyed and can not be restored under the present conditions. When the new equilibrium is established, Italy will reclaim Trieste; Germany will take back the German provinces which form so important a part of the United Austrian Empire; the States will unite in Slavonia, and, voices according to the theory of the Pan-Slavists, while Roumania will probably not emerge with empty hands.

Time to Call a Halt.

NEW YORK, June 1.—A brief review of the statistics of immigration shows 9,000,000 aliens have landed at this port since 1847, and of these 3,000,000 have been landed here since 1880. This year there have already been landed 170,000, and over 135,000 have come in since April 1st. The number landed

at Castle Garden this month will be as great as the total number in the year 1878, and much larger than that of either of the years 1868 or 1867. During week before last there were landed thirty ships, bringing 22,669 steerage immigrants. It is probable this will be the greatest year on record for immigration.

The Story About Villard.

NEW YORK, June 1.—Charles A. Spofford, Henry Villard's secretary, denies that there is truth in the dispatch from Berlin, stating that Villard is interested in fitting out a German expedition to the South Pole. He said Villard was not in Berlin, but at Carlisle for his health, and further, that all his time was occupied in this. He is not interested in any German undertaking, let alone such a scheme as stated in the dispatch. "If he was connected with such an expedition I should know it," he added. "The whole story is without foundation."

Fuller's Nomination.

WASHINGTON, June 1.—The Senate Judiciary Committee yesterday further considered the nomination of Fuller, but did not reach any conclusion. Another meeting will be held later today or to-morrow.

There seems to be no doubt that the committee will report favorably on the nomination. The day is said to be due rather to a fear that the committee will be accused of haste and want of thoroughness if it negative or examine and weigh all that is laid before it than to any special matter which has been charged against the nominee.

A Young Wife Killed.

CHICAGO, June 1.—David H. Calvert of the Board of Trade and doing a commission business, accidentally shot and killed his 18-year-old bride, at their home in this city this morning. He had dressed himself and was picking up his watch and revolver from the bed when the weapon was discharged. The ball struck his wife in the breast and passed through her body, causing her to fall. The young husband fainted and raved furiously as he was taken to the police station.

Department of Labor.

WASHINGTON, June 1.—The conference report on the bill to create a Department of Labor was accepted, and the bill passed substantially as it came from the Senate. The House has proceeded to consider the report of the Committee of the Whole on the Legislative Appropriation bill. Later the House went into Committee of the Whole to consider the tariff bill by sections for amendment under the five-minute rule.

A Woman to be Executed.

PORTLAND, June 1.—Judge Langford pronounced sentence of death at Walla Walla to-day upon Mrs. Pyle and her son, John Hunz, convicted of murder and arson in burning the Aurora Hotel. The date of the execution was not announced. The woman died profusely at the mouth on being taken into court, and had to be carried to a chair. The Judge refused to grant a new trial of the case. W. S. Clink was also convicted on the same grounds.

Emperor Frederick.

BERLIN, June 1.—The Emperor had a satisfactory night. Yesterday he granted a long audience to Baron von Seidenweber, German Consul at Havana. The police now refuse to allow the people to throw flowers and petitions at the Emperor's carriage when he is driving.

BLAINE AGAIN DECLINES.

The Plumed Knight Says in Unmistakable Language That He Will Not be a Candidate.

The New York Tribune, in its issue dated the 30th ult., published the following letter from Mr. Blaine:

PARIS, May 17.—Whitelaw Reid, Esq. My Dear Sir: On my return to Paris from southern Italy on the 8th instant, I have learned—what I did not before believe—that my name may yet be presented to the National Convention as a candidate for the Presidency of the Republican party. A single phrase of my letter of January 25th from Florence, which was decisive of everything that I had personal power to decide, has been treated by many of my most valued friends as not absolutely conclusive in ultimate and final effect.

On the other hand, friends equally devoted and disinterested have constructed my letter as it should be construed—to be an unconditional withdrawal of my name from the National Convention. They have, in consequence given their support to some of the eminent gentlemen who are candidates for the Chicago nomination, and who are to be elected.

On the 21st, I called on Matt P. R. Jun. 1st 1888. 10 a. m.

Notice.

THE OLD LOCK AT THE HILL SIDE Cmet ry, becomin' broken on be- or D. Y. Wm. Sanders has had a new one placed on the gate, and 1 persons can enter and sell for each, which re- ceives a superior good at the low st. prices.

Fruit!

THE PALACE BAKERY IS NOW RE- OPENING ONE OF THE CHOICEST RUE OF THE SEASON, ESPECIALLY CHERRIES, WHICH CAN BE SOLD FOR EACH, WHICH RE- CEIVES A SUPERIOR GOOD AT THE LOW ST. PRICES.

Fruit!

ONE ROAN FILLY, THREE YEARS OLD, reddish diamond, dot in center, on light shoulder, also a small white filly, no brand. Please give information when found.

JAMES GAULT.

PROPOSALS WANTED.

Bids will be received by the Nevada State Agricultural Society until 12 o'clock noon, June 9th, 1888, for the following work:

FIRST—For the erection of 150 stalls and 75 open stalls, or more or less.

SECOND—For the building of a Grand Stable, 21x150 ft.

THIRD—For the building of 500 feet, more or less, store, 5 ft. foundation, 18 inches wide and 18 inches high, to be 6 inches under ground.

FOURTH—For the building of one-half mile, more or less, and 100 ft. wide, 4 ft. high, 10 ft. to 12 ft. deep, to be 12 ft. deep, not less than 2 feet deep.

FIFTH—For the building of one-quarter mile, more or less, and 100 ft. wide, 4 ft. high, 10 ft. to 12 ft. deep, to be 12 ft. deep, not less than 3 ft. deep.

SIXTH—For the sinking of 100 post holes, in or less, two feet deep.

Separate bids required for each subdivision. Bids required for the erection of the building, to be paid in full when the work is completed, and the cost of labor, and materials, and shingles. Bids required for the fencing by the rod. All lumber and material to be furnished by the Society.

Plans and Specifications

Can be seen at the Secretary's office. The Board reserves the right to reject any and all bids.

Address all bids to C. H. Stoddard, Secretary, P. O. Box 100, Reno, Nev.

CHARLES H. WINTER, President.

C. H. STODDARD, Secretary.

Information and Probable Cost of Building

In both brick and wood, and price of building material.

Furnished Free of Charge.

Residence and place of business—Corner First and Stevenson streets, Reno, Nev.

COLO-RED WORK & FALL DEC- RIPPING, neatly, promptly and cheaply done at the GAZETTE OFFICE.

TELEGRAPHIC BREVITIES.

John Bright is seriously ill.

Leprosy is spreading at a fearful rate in Russia.

Blaine has recovered from his cold and is still staying at the Hotel Binda, Far.

The land on which Major Andre was executed at Toulon, N. Y., brought only \$35 an acre.

The German prisons are being filled up with Socialists, who are arrested for distributing sedition tracts.

The French Senate, without debate, has passed the bill imposing a surtax of 500 francs on imported alcohol.

The annual convention of the United States Brewers' Association is being held at St. Paul. It has been determined to make a vigorous fight against the prohibitionists.

The Rome Moniteur in an article, supposed to have been inspired, says: The Pope sharply reproves the Irish priests who attended the meeting held to protest against the rescript.

President Cleveland is said to have sent a personal messenger to Governor Hill, asking him if the Administration favors his renomination for Governor of New York.

At New Brunswick, N. J., Elizabeth Thompson, aged 14 years, confessed to an attempt to poison the whole family of her employer with rat poison because she had been reprimanded.

There has been a marvelous rainfall in Colorado during the past few weeks, causing grass to spring up all over the vast, sandy plains, upon which vegetation has never before been seen by the oldest inhabitant.

M. de Freycinet will remove restrictions to soldiers' marriages. He prefers the only formality necessary will be application to the War Office for permission, in which will be granted under ordinary conditions.

The Turkish government has refused to admit Americans to immigrate to America, claiming that they are contract laborers, and their immigration would be a violation of the American law in reference to contract labor.

Chauncey M. Depew presided at the Memorial Day meeting in the Metropolitan Opera House, New York, on Wednesday evening, and the speakers made a happy speech. He said the members of the Grand Army are not addicted to do them any harm, the war being the only trial they have had to undergo.

Not a California Bear.

Anybody can catch a cold this kind of weather. The trouble is to let go, like the man who caught the bear. We advise our readers to purchase of Oshorn & Snowicker a bottle of Santa Abe, the California King of Consumption, asthma, bronchitis, coughs and chronic cures, and keep it handy. 'Tis pleasing to the taste and death to the body. Sold at \$1.00 per bottle, or 3 for \$2.50. California Cat-Cure gives immediate relief. The cat-cure is a drink displaced by its healing and invigorating nature. Give it a trial. Six months treatment \$1.00, sent by mail.

Cure for Sick Headache.

To S. J. Goddard & Co., the drug store, and get a free sample of Dr. Gunn's Headache Cure. It is a good medicine. Sold at \$1.00 for biliousness, \$1.50 for rheumatism, \$2.00 for pleurisy, \$3.00 for biliousness, \$4.00 for rheumatism, \$5.00 for pleurisy, \$6.00 for biliousness, \$7.00 for rheumatism, \$8.00 for pleurisy.

BORN.

SOUCHAREUX—In Vaud, May 23, 1888, to the wife of J. E. souchareux, a daughter.

WEBER—In Winnemucca, May 29, 1888, to the wife of Thomas Weber, a daughter.

DIED.

SWIFT—In Carson, May 31, 1888, Rebekah P. Swift, a native of New York, aged 61 years.

MOTEL ARRIVALS.

PALACE HOTEL—A D Shane, T C Hansen, A P Mathews, San Francisco; H M Barnhart, Ohio; Chas Roberts and wife, Chas; Mrs Bennett, Mr Ferguson, Carson; W Brown, John Lally, G Cough, Virginia City; O Morris, Pine Grove; H Long, Tucson; J D Moore, San Jose.

DEPT HORSE—Chas McCarthy, H G Blackman, New York; Mrs A J Holmes, W Wood, D M Sandler, J W Kinney, San Francisco; The J Delano, Jr., Boston; Mrs J Whelon, Symonds, San Francisco; Mrs Brindley, H C Wren, San Francisco; H W Bracken, Virginia City; A Smith, Chico; J H White, Wadsworth; W Ferguson, St. Clair; M T Hubbard, Sacramento; C E Reed, Hawthorne; W P Moon and wife, Dakes; F G Works, Oakland.

JOTTINGS.

Fine job work a specialty at the Gazette job office.

Go to the St. Elmo to-morrow at noon and get a nice hot lunch and a glass of beer for 12 1/2 cents.

It is a pity that the national conventions come at a time when the base ball season is at its height. So many people would like to follow the proceedings of the convention.

Saddles in all styles and finish at Leeper's harness shop, Sierra street, Reno.

Rud and speeding carts, all styles, of the best manufacture at J. T. Longbaugh's, Reno, Nev.

Strawberries are comparatively low, but the bottoms of the boxes are higher than ever. Another year users of the luscious fruit will likely petition the producers to turn the boxes upside down and fill the bottoms.

H. L. Mead is still shaving for 15 cents and employs nothing but first-class workmen, therefore you can get a first-class shave for 15 cents at the Star barber shop.

Matured This Day whisky for medicinal purposes in quantities to suit at W. Pinniger's drug store.

M. H. Morris' line of the best family groceries can be found in the largest store in the State that is being carried by Wallace & Peers.

In an Alaska coast town the mosquitoes are so large and fierce that they kill dogs. All that place needs is a pine-board hotel to become a dangerous rival to the Atlantic summer resort.

C. A. Thurston keeps neatly-bound copies of the leading American and English poets, besides all the most popular novels in sets.

Bad man—Well, I'm here to stay; I'm dead against the Lent business, tooth and toe-nail. Good lady (horrid)—You must be a heathen! Bad man—No I'm not; I'm a buccineer.

Go to H. A. Hause's grocery store for the best groceries ever brought to this market. Good weight, low prices, and fair dealing with everyone is his motto for doing business.

Schiller was only 14 when he wrote the play of "The Robbers," and, of course, knew nothing about the members of the sugar trust. This accounts for the omission of their names.

At about noon time every day Jake Becker's saloon is crowded with people who don't have time to go home to eat. They get a schooner of Weland beer and a hot lunch for 12 1/2 cents.

H. Rider Haggard recently sent \$5 to a woman who pointed out two grammatical errors in "She." Wonder if he could get a fellow \$10 if he would notify the whole thing was a mistake?

In addition to a complete stock of all kinds of the best stationery, C. J. Beason carries as fine an assortment of the most popular authors as can be found. Call and examine his stock.

They were sleighing and the horses bolted. "George, dear," said the frightened girl, after the horses had run a mile or two, "do you think you will be able to stop him with only one hand?"

"I have been unusually roughed with Coughs, and in fact have had Brown's Bronchial Treacle, which have never failed, and I must say are second to none in the world." —Felix A. May, Cheshire, St. Paul, Minn.

THE GRAF TRIAL.

Witnesses for the Prosecution
Testify—Young Shanno on the Stand.

The second day of the trial of Charles Graf for the murder of Joseph Shanno was occupied in hearing the testimony for the prosecution. H. P. Brown, E. O. Crane and C. O. Porter of Washoe, and S. W. Upson, were examined this morning, and this afternoon Jackson Shanno, the only eye-witness to the tragedy, testified. His testimony thus far is essentially the same as he gave at the preliminary examination of Graf, although under the severe cross-examination of R. H. Lindsay, for the defense, the witness contradicted himself in several material statements. At the hour of going to press a young Shanno was still on the stand.

Meteoerological Summary.

Summary of Meteorological Record for May, 1888, as observed at the Agricultural Experiment Station, State University, Reno, Nevad. :

Mean temperature	56.0
Mean dew point	31.5
Mean relative humidity (per cent)	44.1
Mean daily maximum temperature	70.2
Mean daily minimum temperature	29.5
Mean daily range of temperature	29.5
Lowest temperature (on the 20th)	36.5
Highest temperature (on the 20th)	86.5
Range of temperature for the month	60.8
Lowest relative humidity (on the 12th)	20
Number of cloudy days	2
Number of days on which rain fell	11
Number of thunder storms	4
Number of days on which snow fell	1
Total rainfall (inches)79
Number of days on which frost was observed	4

W. MC. MILLER, Observer.

Narrow Escape of the N. & C. Trestle.

This morning shortly after the Nevada & California north-bound passenger train passed over the trestle a short distance from town, that structure was discovered to be on fire, presumably started from a spark from the passing locomotive.

Mr. and Mrs. Daniel Hutchinson, who live on the edge of town, were the first to discover the blaze, and although at least three-quarters of a mile away from it, they lost no time in carrying water to the trestle, and finally succeeded in quenching the fire.

A Slight Railroad Accident.

At an early hour yesterday morning on the Summit, in the snow-sheds, the east-bound overland train ran into a standing freight train.

The latter train arrived at the station half an hour before the former. One of the locomotives was damaged and the drawheads of several of the cars pulled out. The train kept on the track. A brakeman named Smith in jumping off received slight injuries. One of the engineers complained of a sprained ankle.

A Severe Nasal Hemorrhage.

E. Shannon of Virginia City, who is in Reno attending the trial of Charles Graf, charged with the murder of his son, Joe Shannon, was seized with a severe nasal hemorrhage while at breakfast at the Lake House this morning. Dr. Hogan was called in and applied the usual remedies, but the bleeding did not cease until 1 o'clock this afternoon. Mr. Shannon although weak is resting easy and no serious result is apprehended.

The Republican Delegates.

The delegates to the Republican National Convention from California will pass through Reno on the 11th instant, and will be joined here by the Nevada delegates, and a number of alternates will join them at other points in the State. Six Pullman sleepers and a palace dining-room car have been engaged for their accommodation.

M. of P. Notice.

The members of Amtly Lodge No. S. K. of P., are earnestly requested to attend their regular meeting in Masonic Hall this evening at 8 o'clock sharp. Election of officers and work in the Third Degree.

Chief Thyes has decided to divide the donation of \$40 received from the young lady managers of the Calico Cal between the two fire companies.

Judge Bigelow has filed his decision in the water suit of Van Mater vs. Poynter & Pollard and it will be published in full in these columns to-morrow.

Gazette weather prediction: If no rain, it is not windy, and the thermometer registers about 65 degrees, to-morrow will probably be a pleasant day.

A meeting of the Reno Athletic Club will be held this evening at Armor Hall. As business of importance will be transacted, the leader desires every member to be present.

The racing race at Carson Memorial Day between D. C. C. "Prince" and Sweeney's "Sam Lewis" was won by the latter in three straight heats. Time, 1:21, 1:18, 1:17 1/2.

Dave Eader, one of the jurors, in the grand jury, was selected as foreman. Dr. Hogan was called in and applied the usual remedies, but the bleeding did not cease until 1 o'clock this afternoon. Mr. Shannon although weak is resting easy and no serious result is apprehended.

The Court—If the court should award you the custody of the child, what facilities have you for taking care of it, or at what cost could you take care of it?

"Well, as I am situated at present at the hotel I have no means of taking care of it, and it would be very expensive there to continue to do so. I think that other arrangements could be made by which I could take care of it more reasonably. I think altogether it would take about \$200 or \$250 month to keep myself, nurse and baby."

She stated that during their married life at 813 Sutter street their monthly expenses were \$400, and that while she live at 816 Haight street her monthly expenses were \$250.

She said that since Swalm had been brought under arrest he had been a burden to her property.

She acknowledged that she drew \$10,000 in Los Angeles and used it in one month in that place.

The court asked what was the occasion for drawing so much money here. She replied that she wanted to have it in that form. She said she had not a dollar now. The \$10,000 was paid by the bank to Swalm and he gave it all to her.

The Court—If the court should not award the custody of your child to you, have you any objection to the court awarding it to your husband?

"Yes, indeed, I have an objection to it."

"Why?"

"Because I do not think he is a proper person to take care of the child, or that he understands her wants or needs, and I think he is so thoroughly under the influence of others that he would use her to influence his father, and to let her be under his father's influence to him."

The Court—I understand you could not take care of the child on any allowance less than how much a month?

"I will take care of the child on any allowance your Honor should see fit to make. I don't care how small it might be, but if it is not what it ought to be, I would try what I could do myself."

This closed the testimony in the case and Judge Hunt set the argument for the 24th of July.

At the conclusion of the testimony Mrs. McDonald asked permission to take the child out of the court for its health for a few weeks, which request the court granted, also granting the father permission to take it out walking once or twice a week.

Frank Nash, a logger in the employ of Mariett & Folsom at the Incline, near Carson, was struck by a descending log Wednesday, and received such a blow that death resulted therefrom. The log measured 10 x 10 in. and was a native of Maine aged 20 years.

The Pioneer Hotel, under the management of Boniface Cooper, is fast becoming a popular hotel for those who appreciate cheap but good food and accommodations. Visit the restaurant and invest in a twenty-five cent meal and you will be thoroughly satisfied.

Ex-Sheriff S. T. Swift of Ormsby county died in Carson yesterday after a long illness. The deceased was Sheriff of Ormsby county for fourteen years, organizer of the Swift Engine Company of Carson, and a prominent member of the Masonic and Odd Fellows.

Virginia Enterprise: It was reported in San Fran. a week ago yesterday that H. R. P. Huston, Secretary of the Food Association, had "shot himself" in the head. His body was found in a room in the Hotel Supply Co. Last evening he had his product, and it had overfilled the whole region. Yes! All work on hand in my apartments has "heated" and "soured." I have stopped work altogether. Can't move without assistance. Say, Mr. Tongue, can't you send me down a bottle or two of Dr. Pier's Golden Medical Discovery? Yes! That Buffalo man's remedy! If you don't care to start up again. When the liver stops, however arranged, or the digestive "fire" is on a strike, it is the best "agent" to set the wheels of nature in motion. Druggists have it.

Don't hawk, hawk, and blow, blower, disgusting everybody, but use Dr. Sage's Cawash Remedy.

The Great Strike.

Hello! Hello, there! Mr. Digestion!

The undersigned desire to return thanks to the many friends and acquaintances who so kindly favored us during our recent bereavement in the loss of our son.

Mrs. J. B. RAFFERTY,
J. B. RAFFERTY.

250 BEAUTIFUL LOTS FOR SALE!

From \$200 to \$600!

A Rare Chance for Investment and a Home.

THE MOST LOVELY PORTION OF RENO.

FACING THE TRUCKEE—THE ARISTOCRATIC RIVERSIDE AVENUE DRIVEWAY—SPLENDID SEWERAGE—HEALTHFUL LOCATION AND SAFE FROM FIRE.

The proprietor is now ready to receive proposals for lots in Powning's Addition. The map gives a good idea of the Tract, which is situated between the Central Pacific Railroad and the Truckee River, and commences on the west at a point three blocks distant from Virginia street, making it the most central and convenient of any portion of the rapidly growing town of Reno. Unlike any other part of the town, this addition faces the beautiful Truckee River, and Riverside avenue is certain to become the fashionable driveway of the country. The streets are 80 feet wide, while Riverside and Keystone avenues are intended to be 100 feet in width. All alleys are 20 feet wide. The soil is a rich gravelly loam, and susceptible of the highest state of cultivation. Being situated as it is, it is more exempt from fire than any other section. The regular lots are 50x140 feet. The sewerage is perfect.

Before buying elsewhere, parties will do well to look at these lots.

A WONDERFUL REMEDY

The value of Ayer's Cherry Pectoral, in the protection it affords from the dangers of pulmonary disorders, cannot be overestimated. Mr. C. K. Phillips, Pittsburgh, Pa., writes: "About three years ago I had severe Laryngitis, which resulted in chronic hoarseness. By the use of Ayer's Cherry Pectoral I have since entirely regained my health." Mr. Henry Russell, Excelsior Printing Co., New York, writes: "Influenza became epidemic in my neighborhood. Several members of my family suffered severely with it, all of whom took Ayer's Cherry Pectoral, and were cured by it in a few days. It is a wonderful medicine for Influenza. Too much cannot be said in its favor."

Ayer's Cherry Pectoral

has cured a Cough in a few doses. It always relieves irritation of the lungs or throat, and arrests the tendency to inflammation. It strikes at the foundation of all Pulmonary diseases, is without a rival as an expectorant, and is a sure cure for the most obstinate Coughs and Colds. L. Garrett, Texan, Texas, writes: "I have used Ayer's Cherry Pectoral in my family for twenty years. For throat and lung diseases, I consider it a wonderful remedy."

Ayer's Cherry Pectoral,

Assessment Notice.

BUCKEYE GOLD AND SILVER MINING COMPANY, principal place of business, R. No. Nev. 4: location of works, Pyramid, Washoe County, Nevada.

At a meeting of the Board of Trustees of the Buckeye Gold and Silver Mining Company, held on the 1st day of M. Y. 1888, it was voted that the stock of the company be divided into 1,000 shares of the capital stock of said Buckeye Gold and Silver Mining Company. Said stock was to be divided into 1,000 shares, each share of the capital stock of said Buckeye Gold and Silver Mining Company, to be held by the Secretary of the company, at the office of the company, in the store of Osburn & Son, watch and jewelry makers, located on the 4th Day of June, 1888.

Will be deemed delinquent and will be adjudged to be forfeited, and not paid by the 7th day of July, 1888, will be sold, or as much thereof as may be necessary to pay such assessment, together with the cost of advertising and expenses of sale.

GEO. H. HUMPHREY, Prop.
May 1, 1888.

[May 1, 1888]

A WOMAN NOW.

"You won't marry me, Ida?"
"No, I think not. I'm quite sure not," added Ida Mornay, after a second or two of hesitation. Guy Hardwick lookedearnstly at her.

"But why not?"

"I don't love you," returned the 16-year old damsel, with extreme frankness.

"Ida you are cruel."

"No, I am not. At least I don't mean to be cruel. Oh, Guy! what made you fall in love with me? We are having such a nice time out here playing croquet games and getting up tandem charades and Ida I am going on picnics. And now it's all spoiled."

"Ida," said Guy, passionately, setting his teeth together, "you are a mere child. You haven't an idea what love means—apart from chocolate creams and new ball dresses," he added bitterly. "What made me fall in love with you? Because I could help it. And now you refuse to give me back so much as a heart-throb in return."

"I can't help that," retorted Ida Mornay, "I don't love so cross, Guy. You made me fall in love with you! Because Ida you are cruel."

"Because I am in earnest, Ida. Try to think of this as a woman should. Try once to tell him out of the trivial world that surrounds you, and tell me from the very depths of your heart if you do not think you can love me."

Little Ida Mornay began to cry.

"I don't want to love you," she sobbed. "I don't know why I should get married. I'm very happy as I am. Mamma says it is time enough or a girl to think of marriage when she is twenty-five years old. And I am only sixteen."

"There," interrupted Guy, bitterly, "that will do. I looked for an ocean of deep, solemn sweetness in your heart, I find but a shallow pool, reflecting back the shadow of transient events—and that is all. Good-bye, Ida. Forget that I have made a fool of myself—if you can!"

And he strode away, biting his lips, and tearing at his long black mustache as he went.

Ida looked after him with quivering dimples in her scald, velvet-blue eyes.

"I don't know what he means," said this little, half-grown girl of womanhood, to herself. "I'm sorry I have offended him, but I couldn't help it!"

And she went back to the hotel for her hour of guitar practicing, feeling a little bewildered and little regretful, as she did when her pet greyhound ran away from her.

Just inside the entrance of the lustral walk was a wild, silvery spot that overlooked the bluish gleam of the lake. Hortensia Carey met Mr. Hardwick. A tall, Juno-like woman of thirty, with soft, swimming, Oriental eyes and a face that was a dream of beauty in itself!

Hortensia Carey had come to Silverview to get a rich husband. Hortensia had the ardent young Southerner and she didn't like "that insignificant little mite of an Ida Mornay," and Hortensia, sunily shielded behind the trees and bushes, heard every word of the declaration of love and its refusal.

"Ida while the iron is hot," said Hortensia to herself. "There's many a heart caught in the rebound and why not Guy Hardwick's?"

So she gazed forward with untroubled eyes, smiling softly beneath their long lashes.

"Mr. Hardwick, are you sad. You look troubled!" she murmured sympathetically.

"Troubled?" he echoed, moodily.

"There's not much in the world but trouble."

"And you say that?" cried Hortensia. "You! Now, I who am only a woman, might utter it with reason."

"Guy looked into her Cleopatra face. Strange that he never before knew how beautiful it was."

"Will you take my arm down this steep hill?" said he. "And tell me what you mean by those last words?"

Hortensia knew how to avail herself of the golden tide of opportunity. Guy Hardwick was just in the mood when a man wants relief from himself. And the upshot of it was that he invited her to go rowing on the lake after suns-

"Don't ask me, if there is any one else you prefer," said Hortensia. "I am accustomed to put myself in secondary position."

"The e's no one I would prefer to you," said Guy, slowly. "No one, at least now."

"Not engaged!" cried Ida Mornay, dropping her croquet mallet. "Guy Hardwick engaged! I don't believe a word of it!"

"I saw the ring myself on Hortensia Carey's finger," said Mrs. Oppenwall. "he told me. She's proud of it, and well she may be, for Mr. Hardwick is by all odds the finest young fellow at the lake this season. I don't quite like Hortensia, but she is very handsome. They will make a splendid couple. Quick, Ida; the are waiting for you to play—it is your turn."

And Ida gave her ball a thump with her mallet, vitally damaging her mallet's play, and not in the least knowing what she was about.

She went home and looked into her mirror.

"You only," said she to herself, "I thought so! I'm only a little insignificant creature, with pale cheeks, sensible blue eyes and hair like flax! Miss Hortensia Carey has eyes like black stars and the height of a queen. She's worth loving—let me say it again! I don't think Guy would have forgotten me so soon."

And then Ida began to cry, she didn't quite know why.

"I think I'm tired of Silverview Lake," she said to herself. "I mean to write to Uncle Theodore to come and take me home. I suppose they'll be married at once, and Miss Carey won't return to Vermont at all. I won't go to the wedding."

Of course the contemplated nuptials of the wealthy Southerner and the beauty of the season made plenty of gossip and social discussion. It found its way into the newspapers, no one knew how (except, perhaps, Miss Hortensia herself). Reporters jotted down the names of Miss Carey's dresses and jewels, the probable number of thousand dollars in income—an! Hortensia's superb lace actually appeared on the front page of the illustrated paper of the day as the Bride of the season.

Guy was indignant enough—but Hortensia only laughed.

"Never mind, dear Guy," said she. "People will talk—and, after all, they don't mean any harm."

But one beautiful summer morning Miss Carey's seat at the breakfast table was vacant—and scarcely had that fact been observed when some one cried out:

"Why, General Vincent is gone, too!"

Underly, it was awkward for the bridegroom to elect. Still more so when a howl went up from the meat of post office gave him to understand that the lovely Hortensia had given back her heart to the general, an ancient suitor of hers who had recently fallen hair to a lar—fortune in Cuban plantations and Jamaica spice woods.

The note was prettily worded; it con-

veyed sentimental regards to Mr. Hardwick that the future they had contemplated so gaudily could never be realized and prayers for pardon in the name of love!

Guy set his teeth together, but he made no comment. He took his fate as it was dealt out to him! Nay, perhaps, in his inmost heart he felt some thrill of relief that he was forever separated from Hortensia Carey. For he had some time since made the discovery that he did not love her as a man should love the woman whom he means to marry.

He sat thinking of these things, his head resting on his hand, his eyes fixed in infinite mournfulness on the far-off blue mountains on the further shore of the lake. As it changed he was smiling on the very spot where, two months since, he had met Hortensia—a when the laundress rustled softly at his side, and Ida Mornay's melting blue eyes shone into his.

"Oh, I am sorry! So sorry!" And she burst out crying.

"Sorry, Ida? Nay, keep your kindly sympathy for those that need it more," she answered, somewhat bitterly. "Am I not better off, by far, than if she had married me? She did not love me, Guy. You see. Nobody loves me!"

"Guy, that is not true."

"It is pretty well proven!"

She came nearer to him, with burning cheeks and glittering eyes.

"I love you, Guy."

He looked up suddenly and then let his eyes fall again.

"Love, little one? Love? You do not know the meaning of the word."

She drew back trembling an sobbing.

"You give me my heart back then, Guy? You do not care for me?" she uttered.

"You know, darling, that you are the only person in the world for whom I truly ever cared."

"I won't let you take me like her lace?"

"And looking into Ida's eyes, Guy read the truth.
